EDUCATION

Asian College of Technology 2022 - 2026
Bachelor of Science in Information Technology

St. Cecilia's College-Cebu, Inc 2020 – 2022
Information and Communication Technology

SKILLS

- **AI Engineering & GenAI:** Prompt Engineering
- **Programming Languages:** C# (Primary), JavaScript, SQL
- **Frameworks & Libraries:** .NET, React, Bootstrap, Tailwind CSS
- **Web Development:** HTML, CSS
- **UI/UX & Prototyping:** Figma
- **Cloud & DevOps:** Docker, Render, Railway, Vercel
- **Data:** MSSQL, PostgreSQL

EXPERIENCE

It Support Intern Talisay City
Ellyza Engineering Works Dec 2025 – Feb 2026

- Assisted with data entry and management using Excel, resolved it-related issues, and supported backend development of a payroll system.

It Support Intern Cebu City
Health Med Enterprises Jan 2025 – April 2025

- Assisted staff with computer-related issues, network configurations and computer setups.

PROJECTS

PJR School Portal Feb 2026 – March 2026
Main Developer (4th year college student)

- Designed and developed a cross-platform application featuring a web-based portal for teachers and a mobile portal for students to streamline access to academic resources.
- Built the backend with ASP.NET Web API and the frontend with React, following a clean client-server architecture.
- Managed full deployment of the application, hosting the frontend on Vercel, containerizing the backend with Docker on Render, and setting up the PostgreSQL database on Railway.
- This is where I truly learn modern web development in contrast to traditional web development. I learned how to handle different origins, Restful APIs, and etc.

Massage Management System June 2025 - October 2025
Full Stack Developer (3rd year college student)

- Developed a full-stack web application using ASP.NET MVC to streamline massage service management, including [booking / scheduling / masseur attendance, payroll, etc.].
- Structured using Service-Repository architecture for separation of concern.
- One of my proudest projects because this was my capstone project and, at that time, I am still exploring the vast world of programming.

Anime Ecommerce Sep 2024 - October 2024
Web Developer (2nd year college student)

- Developed a static frontend web application showcasing anime-themed cards with an interactive UI.
- Managed card data using JSON and implemented a persistent cart and payment history using local storage.
- This is the time where I learned how to integrate payment system to my web projects; I integrated PayPal for the payment method.
